

Sarah Levy, MD — Internal Medicine

1492 Bryant St, Suite 305 — San Francisco, CA 94110

Patient: Chen, Sarah **DOB:** 11-Jun-1976 **MRN:** 4471028
Date of Service: 11/14/2023 **Visit type:** Diabetes follow-up

HPI

Sarah returns for routine 3-month diabetes follow-up. Her August A1c (drawn 08/21/2023) was 7.2%, the best reading since her diagnosis in January. She reports doing well overall. Sleep is normal, energy is good, no hypoglycemic episodes. She has been walking after dinner 4–5 nights per week and has shifted to a Mediterranean-style diet over the past 2 months on recommendation from a podcast she listens to.

T2D well controlled on current regimen. Discussed dietary changes, encouraged 30 min walking daily.

Encouraged her to push the walk duration up toward 30 min on most days (currently averaging closer to 20).

REVIEW OF SYSTEMS

Constitutional: well. CV: no chest pain, no SOB. GI: occasional reflux, managed with OTC famotidine p.r.n. GU: no nocturia. Neuro: no paresthesias in feet.

VITALS

BP 124/78 HR 72 T 98.0°F Wt 169 lbs (down 9 lbs since January diagnosis).

EXAM

NAD. Feet: monofilament intact, pulses 2+ DP/PT bilaterally, no skin breakdown. Cardiovascular and pulmonary exams unremarkable.

MEDICATIONS (CURRENT)

Continue metformin 850 mg PO b.i.d. as currently prescribed.

Atorvastatin: not currently prescribed

Aspirin: not currently prescribed (low CV risk score)

OTC: famotidine 20 mg p.r.n. for occasional reflux

ASSESSMENT & PLAN

1. **T2D, well controlled.** A1c 7.2% on current regimen. Continue at present dose. Will recheck A1c in 6 months given stability and patient preference for fewer lab visits.

2. **Lifestyle.** Sustained dietary and exercise changes. Reinforced current pattern.

3. **Cardiovascular risk.** Pooled cohort 10-yr ASCVD risk is borderline. Will discuss statin initiation at next visit if LDL remains elevated.

Counseling: 10 min on continued lifestyle adherence and the value of routine diabetic foot/eye/kidney monitoring on the standard schedule.

Next visit: 02-Feb-2024, 0945, with Dr. Levy. Annual diabetic eye exam referral placed (separate document).
