

Karen Wu, MD — Obstetrics & Gynecology

2200 Geary Blvd, Suite 410 — San Francisco, CA 94115 — (415) 555-0188

Patient: Rodriguez, Maria **DOB:** 14-Mar-1972 (52F) **MRN:** 8821345

Date of Service: February 8, 2024 **Visit type:** Annual GYN

CHIEF COMPLAINT

Annual gynecologic visit. No complaints.

HPI

Annual GYN visit. Pt c/o no breast complaints. Breast exam: no masses palpated bilaterally. Plan: routine screening mammogram.

Maria returns for her routine annual gynecologic visit. Last seen 02/15/2023. She has no breast complaints — no pain, no nipple discharge, no skin changes. She does monthly self-breast exams and reports they have been unremarkable. No new lumps. Family history significant for maternal aunt with breast cancer dx in her 60s. No first-degree relatives affected.

Menstrual history: peri-menopausal, last menses approximately 3 months ago. G2P2, both vaginal deliveries (2001, 2004).

REVIEW OF SYSTEMS

Constitutional: well. GU: no dysuria, no hematuria. GYN: no vaginal bleeding, no discharge. Breast: as in HPI. Endocrine: occasional hot flashes, mild, not bothersome.

VITALS

BP 118/74 HR 68 T 98.0°F Wt 142 lbs BMI 23.6.

EXAM

General: well-appearing, NAD. Breasts: symmetric, no skin changes, no palpable masses bilaterally, no nipple discharge, no axillary lymphadenopathy. Pelvic exam: external genitalia normal. Speculum exam: cervix appears healthy, no lesions. Bimanual: uterus normal size, no adnexal masses or tenderness.

ASSESSMENT & PLAN

1. Routine annual GYN exam — unremarkable.

Refer to Breast Imaging Center for screening mammogram.

Last screening mammogram was 04-Feb-2022 (over the 24-month interval, due now).

2. **Cervical cancer screening.** Pap + HPV co-test performed today. Last normal co-test 02/15/2023. Will report results within 7 days.

3. **Peri-menopausal symptoms.** Mild, non-bothersome. Reassurance provided. Discussed expected timeline and lifestyle measures (sleep hygiene, layered clothing). No pharmacologic intervention indicated at this time.

4. **Health maintenance.** Bone density scan not yet indicated (age, no risk factors). Colonoscopy due in 2026.

Next visit: annual, scheduled 02/14/2025.
