

Quest Diagnostics — Laboratory Report

Patient: CHEN, SARAH **DOB:** 06/11/1976 **Sex:** F

Ordering Provider: Levy, Sarah, MD **Account:** 4471028

Specimen: Whole blood, EDTA tube

Collected: 08/21/2023 0728 PT **Received:** 08/21/2023 1502 PT

Reported: 21-Aug-2023 1932 PT **Report ID:** Q-2023-0821-0044712

HEMOGLOBIN A1C (GLYCATED HEMOGLOBIN)

Hemoglobin A1c: 7.2 % (H). Reference range 4.0-5.6 %.

Test	Result	Flag	Reference Range
Hemoglobin A1c	7.2 %	H	4.0 - 5.6 %
Estimated Average Glucose	160 mg/dL	H	68 - 117 mg/dL

INTERPRETATION

The patient's HbA1c has decreased from 8.4% (drawn 04/18/2023) to 7.2%, representing continued response to glycemic management. Goal A1c for non-pregnant adults with diabetes is generally <7.0%.

A drop of this magnitude (-1.2 percentage points) over a 4-month interval is clinically meaningful. Continued therapy at the present level with ongoing lifestyle measures is recommended unless otherwise directed by the ordering provider.

METHODOLOGY

HPLC (high-performance liquid chromatography), NGSP-certified.

Lab Director: K. Hoffman, MD, PhD. Questions: 1-866-MYQUEST.
